

CRUSHING MAINTENANCE SPECIALISTS

The cost implications of time delays can be massive, so choose Linkforce, the maintenance shutdown specialist. When it comes to Crushing Maintenance, our specialist Crushing Division offers experienced personnel plus quality equipment and tooling, so we complete your time-critical Crusher Shutdown with optimal efficiency.

Even more so, with our highly skilled labour force committed to OHS, we rapidly respond to your project needs in a safe and timely manner. No matter the scale or the location, we ensure safety is the top priority.

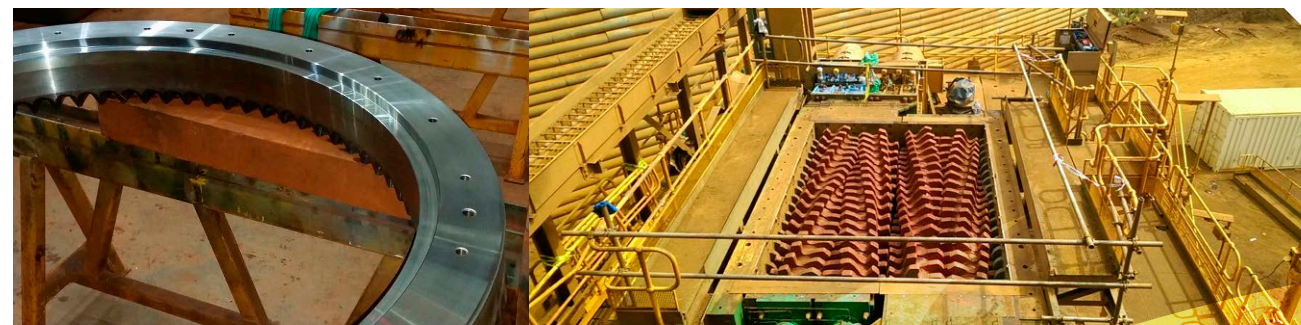

TRUSTED EXPERIENCE

With Linkforce Engineering, no job is too large or too small, and complexity is never an issue. We thrive on challenge, utilising our extensive experience to deliver a turnkey project solution. With our head office in Perth, we're also on the ground in multiple locations throughout the North West.

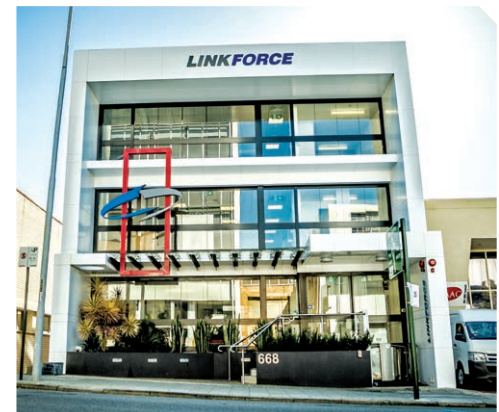

Our workforce with a fleet of modern equipment are always ready to go, wherever and whenever you require. With this integrated capability, we can tailor a solution for each project, assembling a specialist workforce from our team of experienced tradespeople and management. Our leadership skills and site experience represent vital assets for your project, ensuring all work is completed on time, efficiently and safely.

LINKFORCE ENGINEERING

SAFE. VERSATILE. EFFICIENT.

The proven systems implemented by Linkforce Engineering are designed to optimise productivity. However, at the same time, our operational focus is constantly committed to an important goal of zero harm to people, the environment and local communities. We consider sustainable environmental outcomes and quality performance as essential components to success, with the health and safety of all personnel of fundamental importance.

Leadership at Linkforce isn't the sole responsibility of senior management — every employee is a leader in their respective field. As a group, we're renowned for overcoming the toughest challenges, always finding innovative, cost-effective solutions to ensure productivity is optimised.

To discuss a tailored, cost-effective solution from a proven performer, contact Linkforce Engineering.

SPECIALIST CRUSHING DIVISION

A specialist provider of shutdown maintenance, our Crusher Maintenance and Crusher System Improvement services are integrated into our professional offerings to the mining industry. Our Specialist Crushing Division enjoys a hard-earned reputation for its high capability and consistent quality. Mobilised to your site with

minimal ease, our highly skilled personnel, quality equipment and specialist tooling (specific to crushing maintenance) helps to save you time and money during plant shutdowns. As an integrated service tailored to your project needs, we pride ourselves on our ability to streamline processes and improve cost-efficiency.

LINKFORCE ENGINEERING

HOW CAN YOU BE CERTAIN YOU'LL BE READY AFTER SHUTDOWN?

CHOOSE LINKFORCE.

FLEXIBILITY AND RELIABILITY

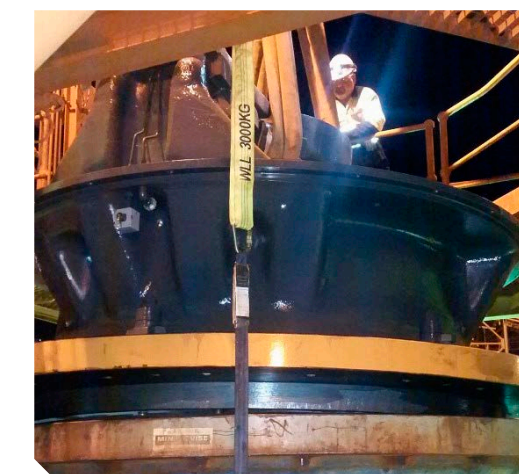

With our modern fleet of vehicles, plant and equipment based in depots throughout WA, we avoid reliance on outside resources. As such, we're always certain of our delivery capabilities, timeframes and costs. Total equipment ownership — coupled with our experienced workforce — provides the flexibility to allocate resources when and where they are required.

PROVEN PERFORMANCE

Regardless of the scope — and always with a focus on quality and safety — we'll meet your crusher system maintenance needs in the most timely and cost-effective manner. We deliver on this promise through:

- Best practice health and safety standards
- Extensive, skilled and experienced workforce
- Specialist equipment encompassing tooling, transport and plant
- Dedicated logistics services
- Highly efficient support systems and procedures

THE VALUE OF QUALITY CRUSHER MAINTENANCE

It's an industry fact that regular scheduled maintenance of a crusher system is the most critical step in maintaining its day-to-day reliability and optimum output. More importantly, professional crusher maintenance can meet time management goals, avoid the cost of breakdowns, and improve safety goals. However, it's vital to choose the right team: Linkforce has the best resources, quality tools and the can do attitude to keep your valuable Crushing equipment on line performing at its optimal.

TAILORED INTERGRATED SOLUTIONS

As an integrated, specialist engineering group, we plan and deliver maintenance projects and fixed-price operational projects safely, on time and on budget. No matter the scale or the location, our integrated capabilities allow us to tailor a unique solution to your crushing maintenance requirements.

We offer:

- Experienced senior projects and maintenance team
- Specialised consultants on call when required
- A team of exceptionally skilled trades people
- Depots located in Kewdale, Newman, Karratha and Port Hedland
